

Galvanic Spa® Facial Gels featuring ageLOC™

OVERVIEW

The Nu Skin Galvanic Spa System II and specially-formulated facial gels deliver spa-like results in just five minutes—no appointment necessary. Pre-Treat Gel conditions the skin and helps remove impurities so your pores can breathe. Newly formulated Treatment Gel features ageLOC technology, a new patent-pending ingredient blend that helps slow free radical production in the epidermis and inhibits the visible signs of aging.

ageLOC TECHNOLOGY

Have you ever wondered why some people look young for their age? New research from scientists at Purdue University reveal a previously hidden internal aging accelerator in the epidermis that increases as we age. Present on the surface of our cells, this invisible enemy is capable of generating skin-damaging free radicals that can destroy collagen and elastin and diminish production of these critical proteins.

Nu Skin scientists have identified a breakthrough technology to slow production of those free radicals in the epidermis. The patent-pending ageLOC ingredient blend is the only technology designed to reduce the visible signs of aging by targeting this invisible free radical generator.

BENEFITS

- Slow visible signs of aging at their source with ageLOC technology included in the Treatment Gel
- Enhance skin hydration; leave skin feeling soft, clean and refreshed
- Save time in the comfort of your own home with visible results in as little as five minutes per day, twice a week
- Save money with an economical alternative to expensive spa treatments
- Restore skin's natural vibrancy by removing impurities and promoting cellular energy

THE DIFFERENCE. DEMONSTRATED.

A recent study at Stanford University shows that individuals with low activity levels of an age-related enzyme (arNOX) are clinically graded to look an average of seven years younger than their actual chronological age. Individuals with high levels of this enzyme appear to be an average of seven years older than their actual age.

Galvanic Spa Facial Gels with ageLOC are specially designed to help prevent the expression of free radicals in the epidermis associated with the arNOX enzyme. This prevention may help slow the signs of aging caused by accelerated free radical production.

COMPLEMENTARY PRODUCTS

- **Tru Face Essence Ultra** uses patented Ethocyn and an antioxidant network to protect to restore and protect facial firmness
- **Tru Face Line Corrector** is used in conjunction with the Galvanic Spa spot treatment head to improve the appearance of medium to deep wrinkles with collagen-signaling peptides
- **Nu Skin 180 Anti-Aging Skin Therapy System** is designed to reverse the full range of aging effects products that work synergistically to deliver anti-aging benefits

AVAILABILITY

Galvanic Spa Facial Gels with ageLOC are available in January 2009 from independent Nu Skin distributors, at www.nuskinusa.com or by calling 1-800-487-1000.
Galvanic Spa Facial Gels with ageLOC, US\$46, four gel sets
ageLOC Spa Package, US\$350
