

Comfort is at Hand...

Oasis® Moisturizing Mouthwash and Mouth Spray are new solutions for those who suffer from dry mouth, or Xerostomia.

Oasis

- Oasis Moisturizing Mouthwash and Mouth Spray provide lasting moisturization to help **manage dry mouth symptoms for up to two hours.**
- Oasis provides two solutions that dry mouth sufferers can use to help manage their symptoms as part of their daily oral hygiene routine:
 - The minty-fresh moisturizing mouthwash can be used in the morning and at bedtime.
 - The portable mouth spray provides fast relief and fits easily into a purse or briefcase for convenient use away from home.
- Dry mouth sufferers are never far away from their Oasis. The products are conveniently sold **over-the-counter** and are available at mass merchandisers, and drug and food stores nationwide.

Tri-Hydra™ Technology

- The unique, patent-pending Tri-Hydra formula uses a combination of ingredients to coat and moisturize the mouth.
- The Tri-Hydra formula works in three ways:
 1. **moisturizes** the mouth,
 2. **locks** in that moisture,
 3. **protects the mouth from drying out.**
- Oasis helps maintain a comfortable moisture level by trapping water molecules.

Benefits

- Finding relief doesn't have to be time-consuming. Oasis mouth spray provides **immediate and lasting relief** from dry mouth for up to two hours.
- In addition to providing lasting moisturization, Oasis won't harm users' teeth. Both the mouthwash and spray are safe for use with fluoride-treatment products, and are **sugar-free, alcohol-free and enamel-safe.**
- A welcome addition to the daily oral care regimen, Oasis provides lasting management of dry mouth for up to two hours. Dry mouth sufferers are also sure to appreciate the refreshing mild mint flavor.

Dry mouth sufferers trying Oasis can call 1-800-DRYMOUTH for a free brochure and Oasis product sample. Or visit www.oasisdrymouth.com for more information.
