CLINICAL STUDY PARTICIPANT FEEDBACK

WaterWorks Clinical Study Participants Share Their Experiences

The following are quotes from participants in the clinical study:

"I liked the fact that WaterWorks was all natural and used just tap water. It made me feel more confident, more feminine and fresher. I was happy with the results and so was my husband. I would definitely recommend it to my friends."

— *Ah Niles, Atlanta*

"I was impressed with WaterWorks. It was different from what I tried in the past, and I had tried a lot from over-the-counter products to douches and even homemade remedies. I liked how easy it was to use in the shower with tap water. It was easy to clean and more sanitary and made me feel cleaner. I had been really self-conscious in the past about my vaginal odor and hadn't wanted to get close to others. With WaterWorks, I had almost immediate results and the odor didn't return."

— *Brenda Dodson, Yadkinville, N.C.*

"WaterWorks is a lot simpler to use and easy to set up compared to other remedies and, best of all, it was effective. I feel fresher and cleaner during the day and cleaner when I'm with my husband. I was very surprised by the results. I had thought that something so simple that used only water wouldn't do much. But, I noticed a change in just a couple of days."

— *Holly Fleming, Clemmons, N.C.*

"WaterWorks worked – and just with warm tap water. It took only two minutes a day to cure my problem. After a week and a half, the odor was gone. I had more confidence and didn't have to worry. I had given up on douches because they hadn't work. Now, I am 100 percent satisfied."

— *Matilda Gogos, Philadelphia*

Vaginal Health Backgrounder - 2

“WaterWorks is a simple, effective solution that boosted my self esteem. I have always worried about vaginal odor and was always self conscious. It was devastating to deal with this problem every day. Using WaterWorks has reassured me. My fiancée hasn’t said anything, but I’m sure he’s noticed.”

— *Nancy Stevens, Lawrenceville, Ga.*

“WaterWorks started working for me within the first 24 hours. I like the fact that it’s easy to use and safe with no chemicals. I had used creams and inserts, but they didn’t work and the odor came right back. I was so impressed with WaterWorks using stainless steel and water that I not only told my girlfriends and cousins, but I demonstrated the concept: I took an onion and rubbed it on a knife and ran the knife under tap water to show that the odor was gone. I liked WaterWorks so well that I didn’t want to give it back when the study was over!”

— *Stataria Barr, Rural Hall, N.C.*
