

Organic Vegetable Gardens

Gro Your Own

Go Green In Your Garden

When you control what goes into your garden, you'll feel great about what comes out— delicious, nutritious veggies. Most organic garden materials are available at your local garden center so getting started is easy.

Project Steps

Prepare soil amend the soil with organic components. Mix miracle-gro® organic choice® garden soil in with your existing soil or improve the soil with miracle-gro® organic choice® blood meal and bone meal.

Choose plants buy organically grown seedlings in flats or grow your own from seed. Get a jump on the season by planting your seeds indoors in flats or paper cups, then move them outside when the weather warms up.

Plant check the instructions on your plants for proper spacing. Plant in the early morning, dig a hole twice as wide as your plant's root ball, gently place your plant in it, then backfill with soil.

Feed & water water plants regularly and feed them with miracle-gro® organic choice® all purpose plant food.
